Together, we empower the Future

GLOBAL EXPERTISE WITH LOCAL SUPPORT

Operating in over **30 countries** across five continents.

LARGE STOCK AVAILABILITY

Largest **stock range** across Australia and New Zealand.

LOCAL IN-HOUSE SERVICE

Quick, expert support from local certified workshops for motors, drives, energy solutions plus appliance and air conditioning service.

TECO Australia and New Zealand is a trusted name in motion, energy and comfort - supporting industry and daily living through electric motors and variable speed drives, energy solutions, home appliances and air conditioning.

With over 50 years of local presence and the backing of a global group operating in more than 30 countries, TECO combines international strength with local expertise and service.

Our value lies in reliable performance, technical know-how and a deep understanding of the sectors we serve. From mining operations to renewable energy systems, modular buildings to households, our customers count on us for solutions that are efficient, compliant, easy to install and built to last.

Across our three divisions—Electric Motors & Variable Speed Drives, Energy Solutions and Home Appliances & Air Conditioning—we deliver proven technology, responsive support and fast access to certified in-stock products. All TECO operations are ISO certified and aligned with international energy efficiency and greenhouse gas standards, reinforcing TECO's published commitment to long-term sustainability.

With TECO, you're backed by engineering experience, strong local service and a complete portfolio built to meet the challenges of today - and tomorrow.

About us

TECO serves three strategic areas, each with dedicated solutions and a defined customer base:

Electric Motors & Variable Speed Drives

TECO Australia and New Zealand supports sectors where performance and uptime are essential such as: Mining, Oil & Gas, Water & Wastewater, Quarries, Agriculture, Pulp & Paper, Food & Beverage, Manufacturing, Sugar and Cement.

We offer a wide range of Low, Medium and High Voltage motors—including hazardous area models—paired with Variable Speed Drives and automation solutions.

Our in-house workshops deliver certified customisation and our large local stock ensures quick response.

Energy Solutions

We support utilities, industrial sites, infrastructure developers, hydrogen producers, solar farms, data centres and large-scale energy users with solutions that enable decarbonisation, electrification and grid stability.

TECO Energy Solutions Business offers: Dry, Power and Distribution Transformers, along with Busway solutions, solar plant and battery energy storage systems (BESS) – all backed by experienced TECO engineers from planning to commissioning. Additionally, TECO supports selection, installation, commissioning, and ongoing maintenance through in-house expertise and factory-trained personnel.

TECO Home Appliances and Air Conditioning

TECO supports wholesalers, installers, modular building manufacturers, retailers, social housing providers and short-term accommodation operators with air conditioning and appliance solutions tailored for Australian conditions.

Our range covers split, multi split, ducted, window wall, vertical skinny, portable and air curtains solutions; refrigerators, washing machines, dishwashers, microwaves and smart TVs. Designed for ease of installation, energy efficiency and daily reliability, all products are supported by our nationwide service network.

Our vision is to enable progress through smart, sustainable and reliable technologies. Our mission is to deliver the right solution, every time – creating comfort and confidence for those who install and those who live with our products.

Vision

To lead the transition to a cleaner, smarter and more efficient future – where electrification and sustainability go hand in hand. We aim to be a recognised leader in green energy and industrial innovation, delivering solutions that combine power, intelligence and long-term responsibility.

Mission

At TECO, we exist to realise the full potential of electrification – with smart, sustainable solutions that power progress. We work alongside our customers and partners to develop future-ready technologies that improve performance, boost efficiency and drive a more sustainable tomorrow. Every solution we deliver is designed to empower industry, reduce impact and support real transformation.

Values

- **Customer First:** We put your needs at the centre of everything we do.
- **Growth Mindset:** We're always learning and looking for better ways to work.
- **Open Dialogue:** We value honest, clear and respectful communication.
- **Co-Creation:** We work closely with our customers and partners to create smarter solutions.
- **Innovation:** We think ahead and deliver practical ideas that make a real impact.
- **Reliability:** We do what we say and deliver on our promises.
- **Agility:** We adapt quickly to change and stay flexible to your needs.
- **Sustainability:** We make choices that are good for business and better for the planet.

Global and local recognition for sustainable leadership

Global recognition. Local trust. A great place to work. Your advantage.

When you choose TECO, you're selecting a partner recognised globally for excellence, transparency and sustainability.

We're proud to be ranked No.1 globally in the electromechanical industry for ESG performance, according to the 2024 Dow Jones Sustainability Index – Emerging Markets. This means our business practices are responsible, ethical and designed for the future.

In 2025, TECO were once again listed in the S&P Global Sustainability Yearbook, placing us among the top 1% of sustainable businesses worldwide.

For over a decade, TECO has received the Platinum Award at the Taiwan Corporate Sustainability Awards for excellence in corporate reporting – proof of our dedication to openness, clear communication and accountability.

And we don't just talk governance – we live it. TECO has ranked in the top 5% for corporate governance in Taiwan for nine consecutive years, ensuring that every aspect of our business is built on strong ethics, compliance and transparent leadership.

What does this mean for your business?

It means you can rely on TECO for products you trust, advice you value and support you can count on. In 2025, TECO Australia & New Zealand was named one of Australia's Best Places to Work – proof that our commitment to excellence starts with our people. This culture of integrity, collaboration and accountability flows directly into the way we serve you. Whether you're managing high-risk environments, aligning with ESG objectives, or planning long-term infrastructure, TECO delivers peace of mind through proven, globally recognised performance.

Certified for what matters.

In Australia and New Zealand, TECO operates under the most respected international standards to ensure safety, reliability and environmental care in every solution we deliver. Our accreditations include:

- ISO 9001 – Quality Management, for consistent, high-performance systems
- ISO 45001 – Occupational Health and Safety, to protect your people and ours
- IECEx – Compliance for Hazardous Area Equipment, including Ex-d, Ex-e, Ex-de, Ex-nA and Ex-tD
- ISO 14060 – Verified Climate Action and Greenhouse Gas Emission Reporting

These third party accredited process and procedures represent a framework of excellence that we apply across every project, product and service we offer.

"TECO is humbled by these honors and consider them as motivation to continue our pursuit of excellence.

We remain dedicated to driving positive change, innovating sustainable solutions and making a lasting difference in the industries we serve and to the world around us."

TECO history. TECO's journey and growth

Founded in Taipei in 1956, TECO Electric & Machinery Co. has grown into a globally respected brand and a publicly listed company in Taiwan.

With operations spanning across Asia-Pacific, the Americas and beyond, TECO employs are approximately 13,000 people worldwide and generates almost AU\$3 billion in annual turnover.

Our global reputation in the electric motor industry was further strengthened with the acquisition of Westinghouse Motor Company (USA) in 1995 - uniting more than a century of engineering expertise under the TECO-Westinghouse name. Today, we continue to operate manufacturing facilities in the United States, holding a leading position as the largest producer of high-voltage motors in the U.S. market.

Through ongoing investment and strategic acquisitions, we've broadened our capabilities in automation, power electronics and smart manufacturing. TECO operates advanced production facilities across multiple continents, delivering high-quality motors, variable speed drives and energy systems at scale, without compromising on precision or performance.

Our global footprint allows us to serve customers with confidence, combining the strength of international resources with the responsiveness and local expertise our partners expect.

ALMOST \$3 BILLION AU WORLDWIDE

SPANNING 5 CONTINENTS

APPROXIMATELY 13,000 EMPLOYEES

A trusted global leader in Australia and New Zealand

At TECO, we build lasting partnerships based on performance, reliability and support. With decades of experience and a global manufacturing footprint, we help businesses across Australia and New Zealand stay efficient, compliant and ready for the future. Our focus is simple: deliver the right solution, with the right support, exactly when and where you need it. Whether you're upgrading a single asset or powering a full-scale facility, TECO gives you the confidence to operate smarter, safer and more sustainably - every day.

TECO global presence

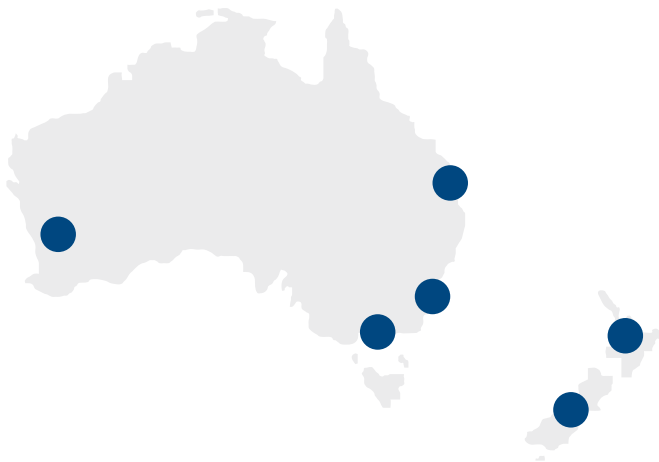

GLOBAL PRESENCE

TECO Australia and New Zealand

TECO Australia and New Zealand combines global manufacturing strength with an established local presence, enabling us to support customers across a wide range of industries, sectors and applications with speed, precision and confidence.

Our network includes six strategically located branches across Australia and New Zealand, supported by a team of more than 160 professionals – from engineers and technical specialists to logistics coordinators and customer service teams. This allows us to respond quickly to local needs, provide direct access to stock and offer on-the-ground support wherever our customers operate.

We hold over AUD \$30m in stock locally, ensuring availability across the business divisions: Electric Motors & Variable Speed Drives and Home Appliances. Whether it's a low voltage motor for a processing plant or air-conditioning, TVs, microwaves and fridges for modular buildings, our inventory is ready to support customers and projects of every size, with short lead times and reliable fulfilment.

Our operational capabilities go beyond supply. TECO's IECEx-certified motor workshops deliver in-house customisations, tailored modifications and urgent builds – supporting industry with specialised compliance requirements, fast turnaround times and high-specification demands. For hazardous environments, our team can adapt and certify motors locally, reducing risk and downtime on site.

In addition, TECO provides expert technical support for home appliances and air conditioning systems, ensuring reliable service and maintenance, through our trained service specialists nationwide.

To further support industrial customers in the field, the TECO App provides online and offline access to motor and drives specifications, technical specifications, technical documents and motors/drives identification data. This empowers installers, service teams and facility managers with instant access to the information they need, even when operating in remote or offline environments.

From metro hubs to remote installations, from one-off orders to national rollouts, TECO is structured to deliver. Our people, stock, systems and tools are built around the needs of our customers—ensuring fast decisions, consistent quality and total support at every stage of the project lifecycle.

160 FULL TIME EMPLOYEES

- Expert teams across engineering, sales, logistics and technical support
- Seamless operations driven by dedicated service and engineering staff
- Ongoing training and strong focus on safety, quality and customer satisfaction.

6 BRANCHES ACROSS AUSTRALIA & NEW ZEALAND

- New South Wales (Head Office)
- Victoria
- Queensland
- Western Australia
- Auckland - New Zealand
- Christchurch - New Zealand

*South Australia - supported by local Sales Engineer

3 BUSINESS UNITS

- Low, Medium and High Voltage Electric Motors, Drives and Automation Solutions
- Energy Solutions
- Home Appliances and Air Conditioning.

AUD \$30M STOCK AVAILABILITY

- Wide stock of motors, drives, appliances and air conditioning ready to go, plus spare parts to keep downtime low
- 6 warehouses strategically located across Australia and New Zealand
- Fast regional access and efficient stock management
- Regular audits and forecasting to ensure product availability.

IN HOUSE CUSTOMISATION

- TECO employs industry trained tradespeople in its ISO9001 and IECEx certified workshops
- We offer a full range of mechanical and electrical modifications ensuring adherence to TECO's stringent QA standards.

TECO APP

- Available for smartphones and tablets, the TECO App enables real-time access to our extensive selection of motors and drives – anytime, anywhere – even providing critical support information when offline or in areas without reliable reception.

TECO

Electric Motors & Variable Speed Drives

Reliable solutions for operational excellence

At TECO Australia and New Zealand, we offer a broad and reliable product range designed to support the demands of industry - backed by trusted expertise and local availability.

Our electric motor portfolio includes Low, Medium and High Voltage motors, covering Squirrel Cage, Wound Rotor, AC/DC, and Single-Phase configurations. Built for performance and longevity, these solutions are proven across sectors including mining, manufacturing, water and wastewater and more. We also supply Invicta industrial vibrators, recognised for their robust construction and consistent operation in rugged environments.

For precision motor control, TECO manufactures and stocks a complete range of Low Voltage Variable Speed Drives, Soft Starters and also manufactures Medium Voltage Variable Speed Drives specifically for local conditions. Designed with advanced control technology and energy-saving features, these systems help businesses improve energy efficiency, increase asset life and optimise productivity across all operating conditions. Our Automation Equipment unit offers a dependable range of control equipment to support day-to-day operations, including DOL starters, Star Delta starters, contactors, overload protection devices and related accessories. We also offer motor monitoring and diagnostic equipment, enabling real-time performance insights and predictive maintenance to reduce downtime and optimise operational efficiency.

From standalone components to fully integrated systems, every TECO solution is engineered to deliver performance, efficiency and flexibility - so you can focus on what matters most: running your operation at its best.

In-stock Low Voltage Motors

- LV Stock Motors locally modified to customer specifications
- Hazardous Area Motors
- Special Purpose Motors
- Invicta Vibratory Motors

In-stock Low Voltage Drives and Soft Starters

- Automation Equipment
- Motor monitoring and Diagnostic Equipment

Medium and High Voltage Motors and Drives

- Squirrel Cage Induction Motors
- Wound Rotor Induction Motors
- Synchronous Motors
- Reverse Engineered Solutions

Electric Motors product range

LOW VOLTAGE MOTORS

LV Premium High Efficiency Motor

MAXe3

- Maxe3 Mining available in stock
- True IP66 protection with porous drain plugs
- Mining motor class F and H insulation system available as standard

AFJE/AFJN

- Steel fabricated terminal box
- Oversized shaft and bearings for V-belt drive applications
- Stock holding 150kW to 600kW, larger sizes available on request

Hazardous Area Motor

- IEC Ex and ATEX Certified for Ex d and Exde Motors
- Ex d (Flameproof Motor and Terminal Box)
- IEC Ex Certified with certification for Ex e, ExnA and ExtD
- Metric frame motor to AS1359, AS/BS frame allocation
- Local certified and accredited IECEx workshops with IECEx QAR from TestSafe Australia

Te3 Cast Iron Series 3Ph Motor

- High Quality Te3 TEFC Squirrel Cage Induction Motor
- IE3 energy efficiency class
- 0.18kW to 315kW
- Severe Duty option available with IP66 protection and class H insulation@180°C
- Metric frame motor to AS1359, IEC60034 frame

LOW VOLTAGE MOTORS

MaxAlloy Low Voltage 3Ph Alloy Motor

- 0.18kW to 18.5kW
- 380-415 Volts 3-Phase 50 Hz (other voltages on request)
- Class F insulation with class B temperature rise
- Lightweight Alloy Frame motor with top mounted terminal box
- IP55 protection rating

Vertical Motor

- Vertical hollow shaft motor, for Deep Well Turbine Pump applications
- 2.2kW to 185kW
- Oversized Angular Thrust bearing, grease or oil lubricated (depending on motor size)
- Fitted with coupling (pilot bored) and non return ratchet at non drive end
- Capable of accepting high thrust load

Open Drip Proof Motor

- HVAC and Refrigeration equipment DOL and VVVF Drive applications
- 7.5kW to 710kW
- Highest quality insulation system utilising Class H and F materials
- Local stock availability

ELECTRIC MOTORS

LOW VOLTAGE MOTORS

Special Purpose Motor

- Air Movement Motor
- Compressor Motor
- Cement Mixer Motor
- Brick Saw Motor
- Evaporative Cooler Motor
- OEM Specific Motor

Single Phase Induction Motor

- B56 TEFC Rolled Steel Metric Frame motor
- 71-80 TEFC Rolled Steel Metric Frame motor
- 90S-132M TEFC Cast Iron Metric Frame motor

Invicta Vibrator Motor

- Electric rotary vibrator with adjustable out of balance weights (10-100%) at both ends
- Base mounted, IM1001
- Total enclosed, IC410, IP66 protection
- BLz base mount vibrator motor is Dust Ignition Protection, ExtD A21 IP66, IEC certified ExSIR 04.007, also ATEC certified for Zone 21 & 22

MEDIUM AND HIGH VOLTAGE MOTORS

Squirrel Cage - TEAAC

- Totally Enclosed Air To Air Cooled
- Vertical and horizontal configuration
- Steel fabricated frame
- Oversized sleeve or antifriction bearings
- Bespoke design & drop-in replacements
- Air cooled/Water cooled/ODP enclosure also available
- Safe & Hazardous Area

Squirrel Cage - TEFC

- Totally Enclosed Fan Cooled
- Vertical and horizontal configuration
- Cast iron frame
- Oversized sleeve or antifriction bearings
- Steel fabricated terminal box
- Bespoke design & drop-in replacement
- Safe & Hazardous Area

Wound Rotor Induction Motor - TEAAC

- Fixed or brush lifting options
- Vertical and horizontal configuration
- Steel fabricated frame
- Oversized sleeve or antifriction bearings
- Steel fabricated terminal box
- Output starting at 18.5kW in LV TEFC design
- Bespoke designs and Drop In Replacement designs available

Variable Speed Drives & Automation Equipment product range

LOW VOLTAGE VARIABLE SPEED DRIVES

Low Voltage Drives

- Squirrel Cage and Permanent Magnet Motor Control
- Built-in-Safe Torque Off (STO) SIL2 safety function protection
- Built in PLC
- Caters for all communication protocols
- IP20, IP21, IP55 and IP66 housing on selected models
- Heavy Duty and Fan Duty available
- Run to Destruction, Fire Mode and Cascading Control features

MEDIUM VOLTAGE VARIABLE SPEED DRIVES

Medium Voltage Drives

- Built in Dry type isolation transformer @180°C
- Low Voltage Power cell feature topology @690V
- Frozen Charge Protection for Mill Applications
- Conforms to IEEE519 - 1992 and GB/T14519-93 standards for voltage distortion and current distortion of the most stringent requirements
- Cascading Control options

SOFT STARTERS

Soft Starters

- Wide range of voltages 200V, 400V, 575V, 690V & 1000V as well as Medium Voltage Options and current ratings from 18A – 1700A Integrated & External Bypass variants, along with Continuously Rated Soft Starter Designs
- Support Modbus, Modbus TCP, Profibus, Profinet, Devicenet & Ethernet/IP (Ethernet Variants incl. Ground Fault Monitoring as an Option)
- High Energy Efficiency up to 99.6%.
- Built-in Motor Protection Features incl. Thermistor Inputs, Current Imbalance, Under / Over Current, Phase Loss.

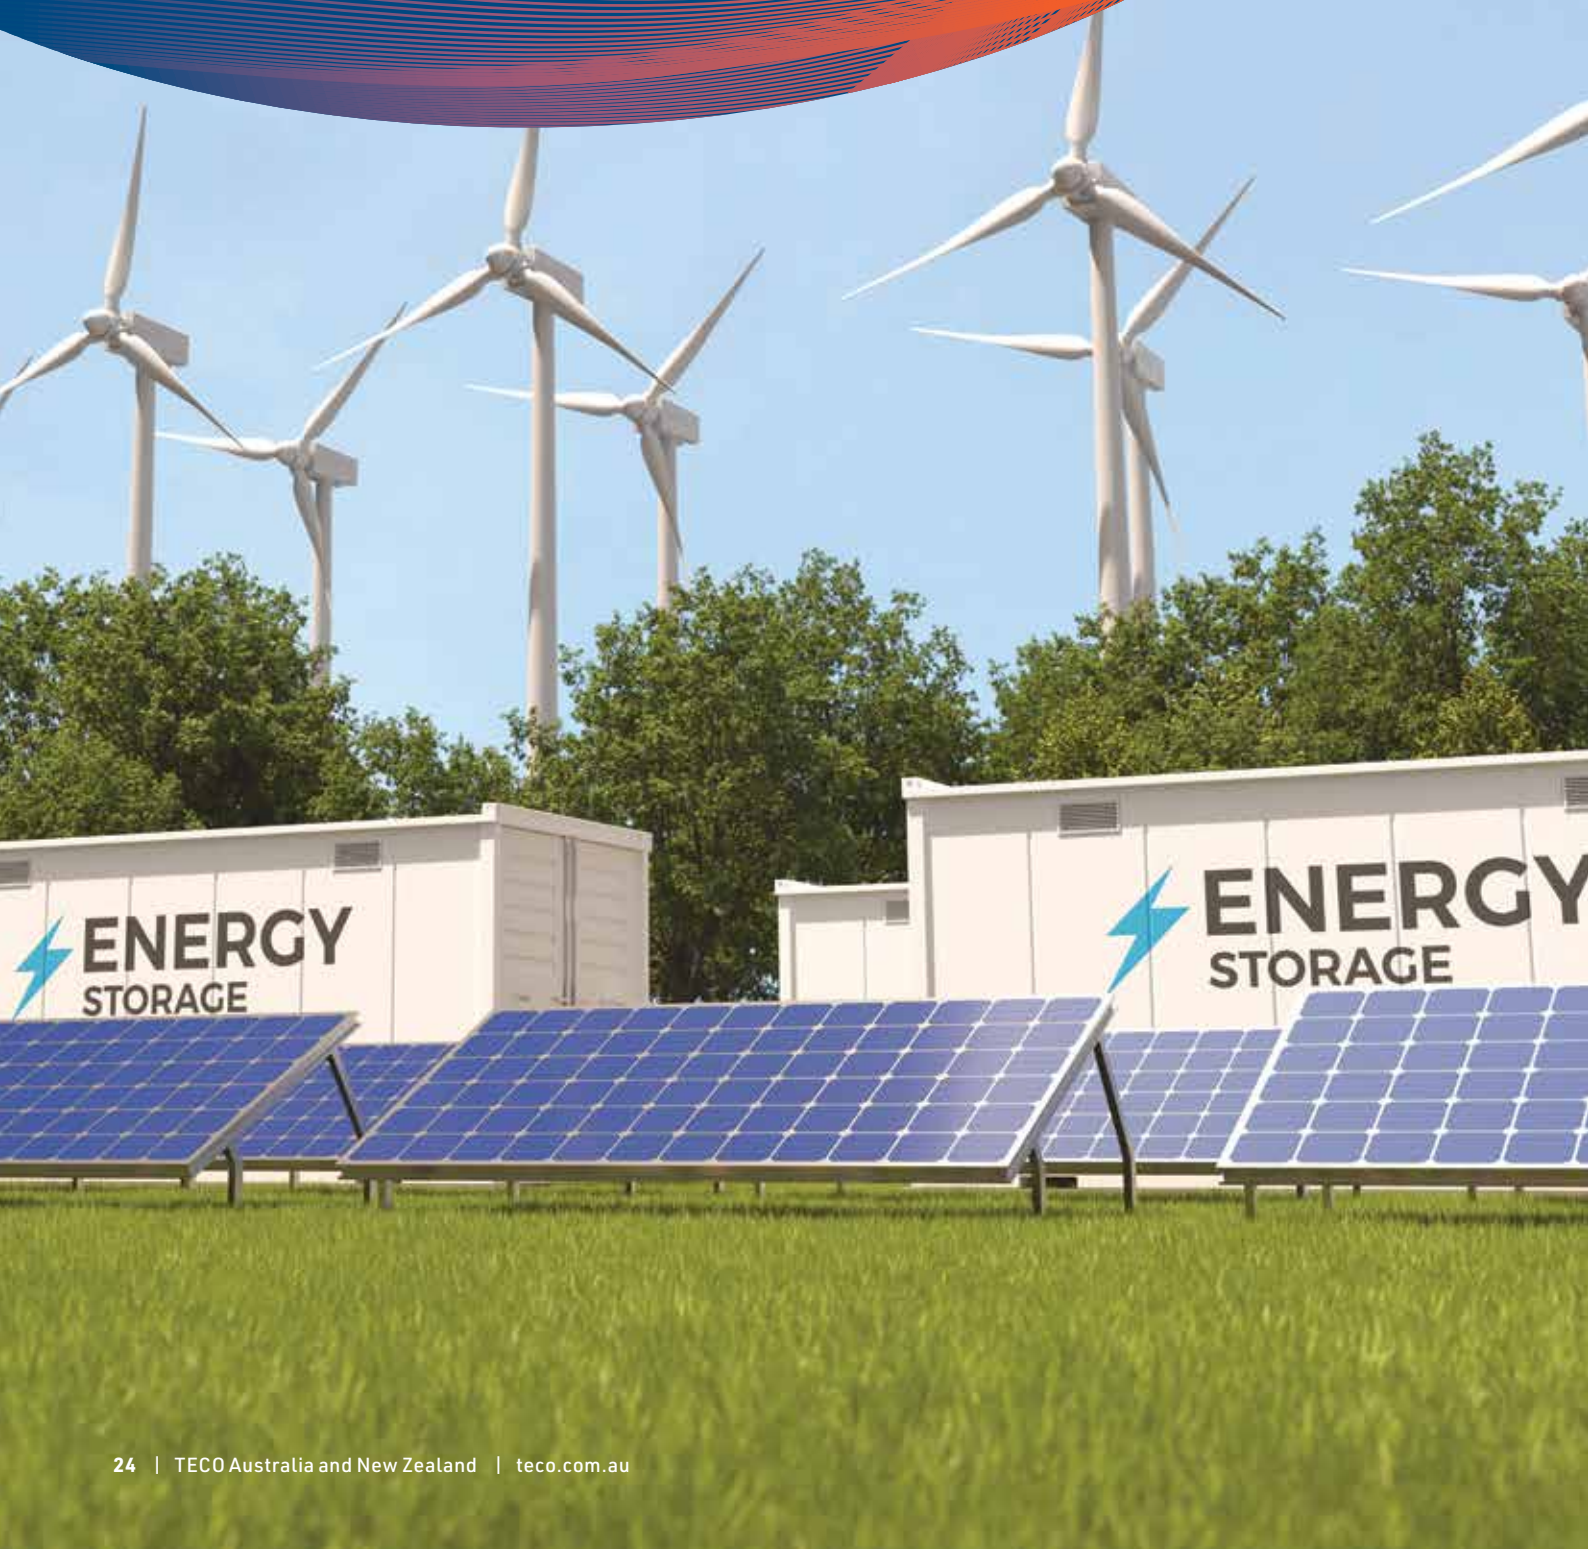

AUTOMATION & SWITCHGEAR

Automation & Switchgear

- Motor starters assembled in IP65 Enclosure AC3 (induction motor starting) rating 240VAC/415VAC coil Voltages (other voltages can be supplied on request)
- CE, UL, CSA and TUV Marked
- Complies to IEC 60947-4-1
- Flexible to suit any application or specification

TECO Energy Solutions

Powering industry's shift to smarter, cleaner energy

TECO Energy Solutions is our dedicated business unit created to support the energy transition.

Built on decades of electrical engineering experience and backed by TECO's global manufacturing strength, this division delivers future-ready infrastructure for industries embracing sustainability, electrification and digitalisation.

Whether you're operating a mine, developing a commercial-scale solar project, or building a hydrogen-ready facility, we're here to support your shift to smarter, cleaner and more efficient energy systems.

As part of our integrated offering, TECO Energy Solutions delivers:

- Dry, Power and Distribution Transformers: designed and tested to meet rigorous IEC and ANSI standards, supporting critical infrastructure across mining, renewables and heavy industry.
- Fully integrated solar plant and battery energy storage systems (BESS) solutions, including EPCM delivery for off-grid and hybrid energy applications, tailored for remote and demanding operating environments.
- Cast-Resin and Metal Enclosed Busway systems engineered for flexible and compact power distribution with high reliability.
- Prefabricated switch rooms to house and protect critical electrical equipment, enabling faster deployment and simplified site installation.

Why energy solutions and why now?

Because industries are under pressure. We are all expected to reduce emissions, improve energy efficiency, stabilise grid performance - all while facing tighter regulation, rising energy costs and growing demand for scalable, reliable infrastructure.

We get it. That's why TECO Energy Solutions exists: to turn these pressures into practical solutions.

Our scope

We design and deliver complete systems tailored to your operation—from heavy industry to high-tech.

- Dry, Power and Distribution Transformers
- Cast-Resin and Metal Enclosed Busway
- Solar Plant and Battery Energy Storage Systems (BESS)
- Pre Fabricated Switch Room Solutions

Engineered energy solutions for real-world demands

At TECO we integrate power, storage and control technologies into smart, scalable packages designed for the realities of industrial applications across Australia and New Zealand.

These solutions include on-and off-grid Green energy generation; our systems can include items such as; Dry, Power and Distribution Transformers and Busway. Each one is engineered to work as part of a flexible energy ecosystem – built for performance, reliability and longevity in harsh environments.

We design around your operation - because no two sites face the same challenges. From remote mining hubs to critical infrastructure, we understand the demands of performance, compliance and continuity. That's why we deliver systems that are not only robust, but also ready for your real-world conditions.

Industries we serve:

Mining & Resources

Green energy solutions, including co-generation and microgrids, solar powered solutions for remote locations and rugged, dependable transformers and engineered bus bar systems built to suit our demanding environments..

Utilities & Renewables

Fully grid-compliant transformers designed for speed, scale and seamless deployment.

Water & Wastewater

Transformers and monitoring equipment, busway engineered bus bar. Electric motor and drive along with green energy solutions to reduce energy demand and / or provide energy continuity for critical applications.

Manufacturing & Process Industries

Green energy solutions addressing various requirements including hybrid and full energy needs. Fully integrated drive and motor systems designed around green energy requirements.

Smart power infrastructure

Dry Transformers

Safe, Efficient & Sustainable.

Cast-resin dry-type transformers offer superior fire safety, maintenance-free operation and oil-free performance. Ideal for indoor installations and urban infrastructure, they provide a compact, eco-friendly alternative to conventional oil-immersed units.

Oil Filled Power Transformers

Versatile range from TECO Power Transformers are engineered for high-demand industrial applications, offering superior insulation, low noise, and advanced cooling systems. Built for performance, efficiency, and reliability in Australia's toughest conditions.

Oil Filled Distribution Transformers

Oil-immersed, 1-phase & 3-phase options.

Designed for industrial, commercial, and utility-scale networks, TECO Distribution Transformers ensure stable voltage regulation, low energy loss, and excellent performance even in harsh environments.

Reliable power distribution with TECO BAR

Low Voltage Cast-Resin Busway

TECO BAR LV Busways deliver compact, IP68-rated, fire-resistant distribution up to 6300A. With sealed epoxy insulation and high-purity copper or aluminium conductors, they ensure safe, low-maintenance power in commercial and industrial settings.

Metal Enclosed Sandwich Busway

Designed for demanding environments, TECO BAR Metal Enclosed Busways offer high conductivity, arc protection, and thermal durability. Certified by KEMA and UL, they're ideal for data centres, hospitals, and vertical builds.

Medium Voltage Busway (Up to 24kV)

With Class H insulation and IP68 protection, TECO BAR MV Busways provide safe, maintenance-free operation in harsh environments. Built with cast-resin and volcanic rock, they support long-term reliability in energy and infrastructure projects.

Solar Plant & BESS

TECO delivers fully integrated solar and battery energy storage systems (BESS) designed for remote and industrial applications.

Our solutions combine solar PV, advanced EMS, and modular battery storage to reduce emissions, cut energy costs, and ensure reliable, off-grid or hybrid power – engineered for harsh environments and critical operations.

TECO

Home Appliances & Air Conditioning

Where performance meets peace of mind

TECO Home Appliances and Air Conditioning deliver reliable and energy-efficient products, built to meet the real needs of the end user as well as meeting the commercial needs of installers, developers, wholesalers and retailers across Australia.

TECO supply a wide range of air conditioning and appliances designed for fast installation, long-term performance and low-maintenance operation - ideal for residential, light commercial and project-based applications.

As a global brand with strong local presence, TECO back our solutions with stock nationwide, technical support and responsive warranty service. Whether you're outfitting a single unit or managing a full-scale development, TECO helps reduce complexity and deliver quality outcomes.

TECO Air Conditioners are specifically built to operate in Australia - from QLD's heat and humidity to regional logistics challenges. Features like inverter technology for highly efficient operation, built in WiFi on many models, self-cleaning indoor units and anti-mould filtration simplify every install. Outdoor units with Gold Fin and Black Fin coatings offer added corrosion protection for coastal or high-risk environments.

What we offer:

- Air Conditioning: split and multi-split systems, ducted, portable, vertical, window/wall units as well as commercial air curtains
- Appliances: kitchen, laundry, entertainment
- Full national coverage, in-house support and stock availability for fast turnaround.

We focus on what matters most:

**ENERGY-SAVING SYSTEMS
THAT REDUCE LONG-TERM
RUNNING COSTS**

**LOCAL STOCK AND CERTIFIED
SERVICE TEAMS ACROSS
AUSTRALIA**

**SMART FEATURES
THAT REDUCE SERVICE
CALLOUTS**

**EASY, FAST INSTALLATION
ACROSS MULTIPLE
CONFIGURATIONS**

Commercial and residential solutions

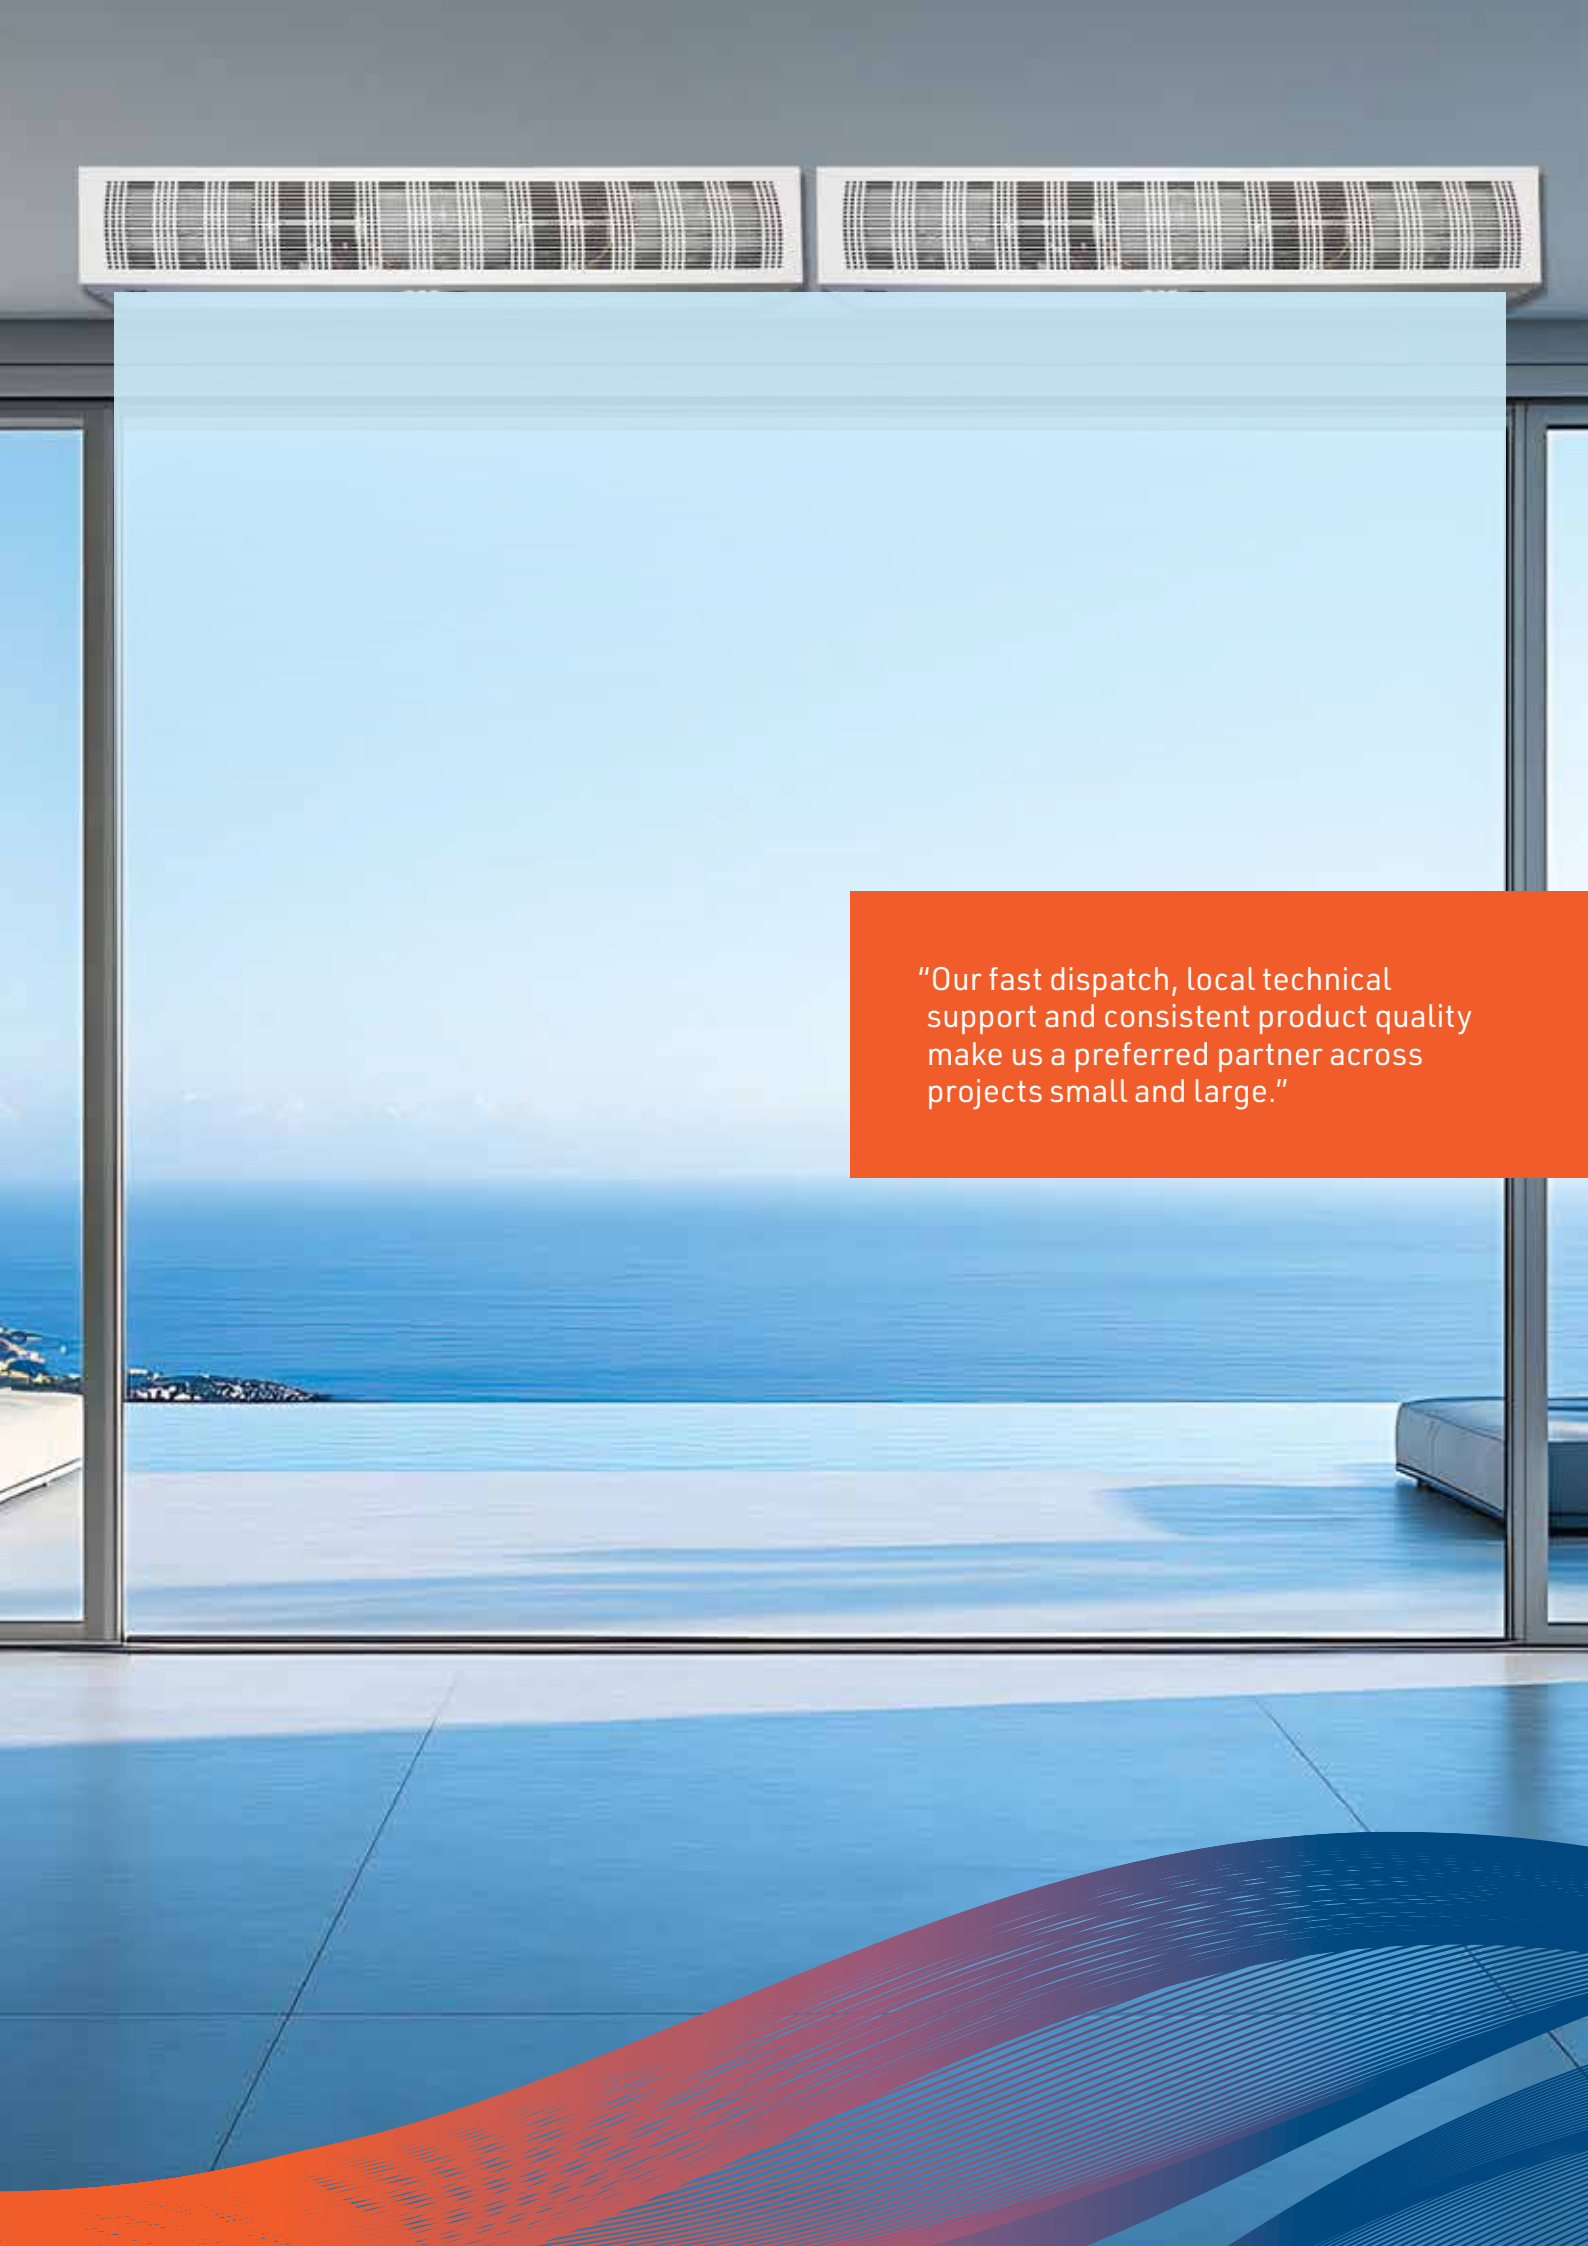

TECO supports a wide customer base with practical, scalable and easy-to-specify solutions.

For commercial applications, TECO offers systems that simplify installation, reduce maintenance and ensure performance across multi-residential projects, portable buildings, hospitality and educational environments. Features like self-cleaning indoor units, built-in Wi-Fi, compact footprints, and high energy efficiency help meet compliance and sustainability goals while reducing long-term operating costs.

For residential settings, TECO appliances are designed for daily simplicity, intuitive controls, and long-lasting performance. From energy-efficient washing machines to smart TVs built for caravans and off-grid setups, we offer the right balance of tech and usability.

We work with:

- HVAC contractors and air conditioning installers
- Builders, developers and modular building suppliers
- Wholesalers and distributors
- Commercial installers and mechanical services companies
- Hospitality, education and tourism accommodation providers
- Leading appliance retailers and commercial resellers.

"Our fast dispatch, local technical support and consistent product quality make us a preferred partner across projects small and large."

Product range

AIR CONDITIONING

Our air conditioning range is engineered for durability, ease of installation and year-round performance - whether you're managing a residential install or outfitting a number of commercial or portable buildings.

Split Systems

Wall-mounted DC inverter split systems, covered by a 7-year warranty for residential and domestic applications, available from 2.64kW to 8.80kW. Designed for high efficiency and everyday comfort, they include built-in wi-fi, 4 way auto swing, 3D air flow and D.R.E.D. connection - ready functionality. Selected models feature gold fin coating for enhanced protection in corrosive environments. Fully compliant with Australian MEPS standards and ideal for residential and light commercial use.

Window/Wall Air Conditioners

Available from 1.60kW to 6.09kW, these units offer flexible installation for wall cavities or sliding windows. Features include R32 refrigerant, built-in WiFi on selected models, silver ion and high-density filters, sleep mode, and inverter technology (model dependent). A reliable choice for compact spaces and retrofits.

Vertical Skinny Units (in window mount)

Available in 2.6kW to 3.2kW capacities, these slimline air conditioners are engineered for horizontal sliding windows and tight-fit spaces. Each unit includes an inverter motor, pre-packed window installation kit, ECO mode, wireless remote, and self-cleaning functionality—making them ideal for rental or temporary accommodation or modular buildings.

Portable Air Conditioners

Compact and flexible, these plug-and-play units range from 2.0kW to 4.6kW. Features include UV sterilisation, inverter operation, 1.5m exhaust hose, 24-hour timer, easy-roll castors and sleep mode. Designed for spot cooling in residential, rental or pop-up commercial spaces.

Ducted Systems

Available from 10.5kW to 16kW, and backed by a 7-year warranty for residential and domestic applications, TECO ducted systems offer whisper-quiet, whole-building comfort. Equipped with inverter-driven brushless DC motors, built-in drain pumps, zoning compatibility and reverse cycle operation, these systems ensure reliable temperature control with high energy efficiency and flexible installation in new or existing builds.

Multi Split Systems

Ideal for multi-room comfort without the clutter of multiple outdoor units. Supported by a 7-year warranty for residential and domestic applications, TECO multi-split systems allow up to five indoor units to connect to a single inverter compressor. Engineered for energy efficiency, zone flexibility and clean aesthetics, they are suitable for small commercial fit-outs, apartments and residential projects.

Air Curtains

Ideal for retail and commercial environments, TECO air curtains create a protective barrier at entrances to maintain indoor temperature and air quality. Features include automatic door sensors, low-noise operation, wireless remote control and interactive displays on selected models.

Product range

KITCHEN SOLUTIONS

Our appliance range is built to deliver reliable, energy-efficient performance in both residential settings and light commercial environments such as modular buildings, short-stay accommodation, alfresco kitchens and off-grid living.

All products are backed by TECO's ISO 9001-certified quality system and supported by our national service network and local stock availability.

Fridges & Freezers

All frost-free with reversible doors, tempered glass shelves, LED lighting and flat-back design. Chest freezers range from 142L to 198L; vertical freezers at 91L capacity feature internal drawers and reversible doors.

Bar Fridges

Single and double door models ranging from 41 to 121L. Options include separate freezer compartments, beverage dispensers, internal lighting and 2L bottle shelf. Compact and ideal for hospitality, studios or outdoor entertainment.

Microwaves

20L, 25L and 30L models with microwave, grill and convection options. Features include quick-start presets, auto cook menus, child locks, weight defrost and digital or push-button operation.

Alfresco Refrigeration

Engineered for outdoor use, these models offer stainless steel finishes, weather-resistant performance and adjustable temperature controls—ideal for alfresco kitchens, patios or commercial food prep zones.

Dishwashers

6, 9 and 14 place settings in benchtop, freestanding and fully integrated formats. Available in 450mm and 600mm widths with quiet cycles, low water use, stainless steel interiors and LED indicators.

Product range

LAUNDRY SOLUTIONS

Smart, efficient and designed for reliability in high-frequency use environments. Our latest top load models - from 6kg to 12kg (include features such as Direct Drive Inverter motors), fuzzy control, soft-close lids and real-time error code displays.

With capacities suited for everything from compact living to large households or multi-residential developments, TECO laundry solutions are built for convenience, flexibility and everyday performance.

Top Load Washers

From 6kg to 12kg, with custom wash programs, delay start, unbalance sensors and stainless steel tubs.

Front Load Washers

From 6kg to 8kg with inverter motors, water-saving tech and compact design for tight laundry spaces.

Twin Tub Washers

10kg capacity, dual motors and water reuse functionality. No fixed plumbing required—ideal for mobile or regional use.

Clothes Dryers

8kg heat pump model with electronic control, LED display, anti-crease cycles and reverse tumbling for consistent drying.

Product range

AUDIO VISUAL

TECO offers advanced Smart TVs equipped with Android 11 Google TV, providing a customisable user interface and seamless access to a wide range of apps, games, and streaming services via Google Play. Integrated Google Assistant enables voice control for convenient operation of the TV and connected smart home devices.

With built-in Chromecast and AirPlay 2, users can effortlessly stream content from their personal devices. Featuring 4K streaming capability and DVB-T2 compatibility, TECO Smart TVs deliver superior picture quality and are prepared for next-generation broadcasting standards.

Smart TVs

From 18.5" 12V models to 70" UHD displays. Google TV with Android 11, Chromecast, voice control and AirPlay2. Built for use in both fixed and mobile environments with HDMI, USB and earphone outputs.

TECO Industries

Industry applications – electric motors & energy solutions

Utility & Power

We supply motors, drives and transformers for continuous operation in power stations, substations and control facilities. Drop-in motor replacements reduce downtime, while our high-efficiency transformers support grid compliance and long-term stability.

Solutions include:

High-efficiency Motors, MV Drives, Soft Starters, Power Transformers, Prefabricated Switch Room plus Substations

Agriculture

From pumps to feeders and irrigation, our motors and drives are engineered for tough conditions. Single- and three-phase options, corrosion-resistant builds and local support help reduce downtime and energy use.

Solutions include:

MAXe3 Motors, Alloy frame single and three phase motors, Drives, IoT Monitoring, Control Panels, Battery Energy Storage Systems.

Mining

We deliver rugged, efficient and safe systems for 24/7 operation in harsh environments. Our mining portfolio includes motors for crushers, mills and ventilation, as well as site-ready power infrastructure through TECO Energy Solutions.

Solutions include:

MAXe3 Motors, LV/ MV Drives, Wound Rotor & Squirrel Cage Motors, Power Transformers, Prefabricated Switch Room and Battery Energy Storage Systems.

Water & Wastewater

We provide motors, drives and transformers for continuous pumping and treatment operations. Real-time monitoring ensure stability and operational resilience.

Solutions include:

LV & MV Motors and Drives, Soft Starters, IoT Monitoring, Power Transformers, Engineered Bus Bar solutions, Battery Energy Storage Systems and Prefabricated Switch Rooms.

Industry applications

– electric motors & energy solutions

Oil & Gas

Our IECEx-certified motors and control systems meet global standards for upstream and downstream environments. TECO Energy Solutions adds compliant transformers for scalable infrastructure.

Solutions include: IECEx LV & HV Motors and Drives, Flame and explosion proof motors, Vibrating motors, Transformers and prefabricated switchrooms.

Food & Beverage

High-efficiency motors and drives suited to power conveyors, mixers and packaging systems. TECO solutions meet Australian standards for cleanliness and safety.

Solutions include: MAXe3 & Flameproof Motors, Food Grade Washdown Motors (Stainless Steel or Coated Alloy), Drives, Soft Starters, IoT Monitoring, HV Motors and Control Cabinets.

Coal Mining

Heavy-duty motor and drive systems engineered for high-load, around-the-clock operation in underground and processing sites.

Solutions include: LV & HV Motors and Drives, Flame and explosion proof motors, Vibrating motors, Transformers and Prefabricated Switch Rooms.

Chemical

Corrosion-resistant, high-efficiency motors and drives engineered for harsh chemical environments, ensuring safe, continuous operation.

Solutions include: LV & HV Motors and Drives, Flameproof motors.

"TECO offers customised motor solutions tailored to specific customer requirements, providing a comprehensive service from design, modifications to final commissioning. Our expert team manages every step of the process – including motor adaptation, testing, certification, installation support and commissioning – ensuring seamless integration and optimal performance on site. This end-to-end approach minimises downtime, guarantees compliance with industry standards, and delivers reliable, high-specification motors ready for immediate operation."

TECO Applications

"All TECO solutions are supported by local stock, technical service and TECO's national warranty network."

Applications – living, comfort & light commercial

TECO's Home Appliances & Air Conditioning division supports Modular Building manufacturers, accommodation providers, commercial developers and retailers with reliable, energy-efficient solutions for day-to-day comfort, retail display and facility needs.

From compact air conditioning systems to bar fridges, washing machines and smart TVs, TECO range is designed for high levels of electrical efficiency, ease of installation, space efficiency and dependable performance in Australian conditions.

TECO Home Appliances and Air Conditioning applications overview:

Modular Buildings & Site Cabins

Reverse cycle air-conditioners, vertical skinny units, compact washers, bar fridges, microwaves, smart TVs.

Short-Stay & Social Housing

Multi split reverse cycle air conditioners, microwaves, dishwashers, top load washers, freestanding fridges & freezers.

Hospitality & Staff Amenities

Benchtap dishwashers, refrigerators, flat screen televisions of all sizes, portable air conditioners and very efficient inverter washing machines and heat pump clothes dryers, portable acs, heat pump dryers.

Retailer Store Displays & Commercial Showrooms

Bar fridges, glass door displays, smart TVs, vertical freezers, split system air conditioners.
